

## Ceramic Little Penguin Nesting Modules for the Derwent Estuary 2021 Project

What it means to 'gift' a Ceramic Little Penguin Nesting Module (LPNM).

Congratulations on your choice to make a difference through your philanthropy to the arts, science, and conservation sector.

By purchasing and gifting this LPNM you are freely gifting it to the Derwent Estuary Penguin Advisory Group (PAG) who will place it in the most appropriate colony to support a little penguin nesting habitat.

All nesting modules will be tested to ensure suitability before they are offered as a home for little penguins. Care will be taken to reduce any disturbance to the colonies. The project will not promote tours nor disclose colony sites to protect little penguins from disturbances.

While all images, data, survey information, or any footage taken in the use of the ceramic LPNM will belong to the project, from time to time you may be contacted and updated about developments in the use of the LPNM module by PAG. Please leave your email contact and indicate if you would like this to occur or not.

For further gifting information please refer to Philanthropy Australia's – Guide for Giving [Philanthropy Gift Giving](#). As we are not a registered charity at this stage tax deductions are not applicable. We thank you for your support.
